

Bionic **SLING**

Pneumatic Shoulder Sling

MANAMED™

Healing Through Innovation™

The Bionic Sling™ is universal shoulder sling with a continuous passive machine to promote small movements after shoulder surgeries to help patients recover quicker.

Features & Benefits (Shoulder Sling & Machine Included)

Bionic Shoulder Sling

- Universal sizing and can be applied to left or right side
- Breathable material for patient comfort
- Includes an abduction pillow and ball to increase blood flow and circulation in the arm

Machine

- Pneumatic passive machine included with the shoulder sling
- To be worn to promote abduction movement with internal and external rotation
- Ability to achieve various abduction angles from 30 to 90 degrees
- Machine is portable, wireless and rechargeable

Common Examples of Use

- To be worn to promote small movements after rotator cuff, arthroscopic, and anterior repairs
- To prevent frozen shoulder
- Shoulder instabilities
- To be worn to eliminate the need for contracture braces

Low profile shoulder brace with multiple abduction angles.
Commonly used for shoulder instabilities and repairs.

Recommended HCPCS: L3960 and E0936
