

## Accelerate Recovery With Low Intensity Pulsed Ultrasound Therapy

The ManaSport+ is a clinically-proven, wearable device ideal for generating deep heat within body tissues.<sup>1</sup> Using LIPUS (low-intensity pulsed ultrasound), ManaSport+ locally increases circulation for the relief of pain, muscle spasms and joint contractures that may be associated with:<sup>2</sup>

- Adhesive capsulitis
- Bursitis with slight calcification
- Myositis
- Soft tissue injuries
- Shortened tendons due to past injuries and scar tissue
- Capsular tightness and capsular scarring

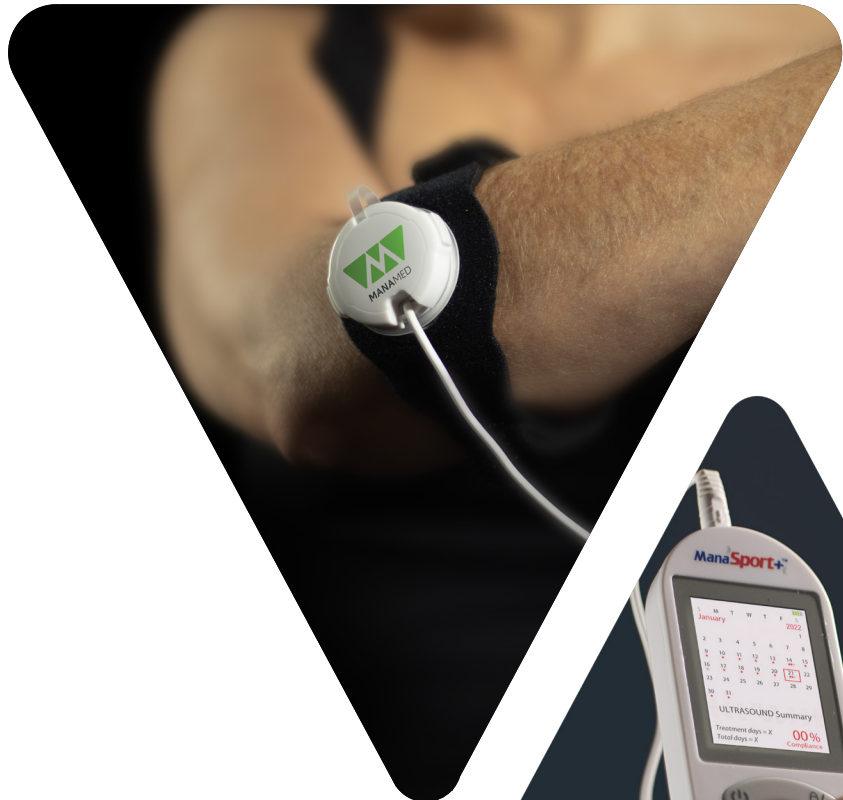

1,2. ManaSport+ Indications for Use
